

MATH 731 Lie Groups and Lie Algebras

Spring 2018 Syllabus

Tue Thu 3:30-4:45 CAS 235

Instructor: Siu-Cheong Lau

Office: MCS 230

Email: lau@math.bu.edu

Office hours: Tuesday 12-3pm

Overview:

Classical Lie groups, associated Lie algebras, exponential map, closed subgroups and homogeneous spaces, classification of simple Lie algebras, and elementary representation theory.

Prerequisites:

Basic differential geometry.

Textbook:

Hall - Lie groups, Lie algebras and representations, An Elementary Introduction

Homework:

We will have homework weekly. Late homework will not be accepted. Students may discuss homework with each other (and are encouraged to do so) but all written work must be prepared independently.

Presentation:

Towards the end of the course, each student will give a 20-minute presentation on his favorite Lie group. You can talk about topological structures, representations, root systems, applications, or any other meaningful topics about your favorite Lie group.

Exam:

There will be one take-home final exam.

Grading:

Homework	45%
Presentation	15%
Take-home final exam	40%
