Math/Computer Science, Room148
111 Cummington Street, Boston

Tea: 3:45pm in Room 144

Abstract: In this talk I will describe an algebraic approach to solve the reconstruction problem in mirror symmetry. In the end, we get a rigid analytic space whose transition functions involve counting invariants of pseudo-holomorphic disks.

See <http://math.bu.edu/research/geom/seminar.html> or contact Si Li sili@math.bu.edu for more information.
